---

Dedicated and detail-oriented Full Stack Developer with extensive experience in building interactive web applications. Seeking to leverage my skills in Angular, React, and Node.js to contribute to innovative projects that enhance user experience and drive business success. Committed to continuous improvement and collaboration within cross-functional teams to deliver high-quality software solutions.

## Experience

---

### Newrise Technosys Pvt. Ltd.

Frontend Developer

Bhopal, Madhya Pradesh

Aug 2024 – Present

- Developed highly interactive web applications using, Angular, React, Express.js,, Node.js stacks, leveraging TypeScript, HTML, and CSS.
- Strong experience in building applications with Angular and REST API integration, including end-to-end tasks of designing, coding, testing, and deploying web applications.
- Proficient in debugging and resolving issues in application code, ensuring optimal performance and functionality.
- Created feature-rich client websites, adhering to company standards and delivering high-quality, well-structured code.
- Delivered code within time and quality expectations and participated actively in peer code reviews.
- Demonstrated solid understanding of JavaScript concepts, including Promises, asynchronous programming, and data handling.

### Capital Hub

Software Developer

Bengaluru, Karnataka

Apr 2023 – Jun 2024

- Experience developing highly interactive web applications utilizing TypeScript, HTML, CSS, Angular.
- Good Experience in developing the Applications using Angular And Rest API Designing, coding, testing, and deploying the application.
- Debugging issues in the application code to ensure it is working correctly.
- Developed and structured feature-rich client websites, ensuring that all needs were met and company policies and procedures followed; created high-quality code.
- Deliver code, to time and quality expectations and participate in peer reviews.
- Strong understanding of JavaScript concepts like Promises and asynchronous programming.

### Wittybrains Software Technologies Pvt. Ltd.

Software Engineer

Noida,Utter Pradesh

Jun 2022 – Mar 2023

- Design, develop, and maintain highly functional and scalable web applications using Angular.
- Experience developing highly interactive web applications utilizing TypeScript, HTML, CSS, Angular.
- Write clean, maintainable, and well-documented code adhering to best practices.
- Collaborate with designers, back-end developers, and product managers to translate design mockups and user stories into functional web features. Stay up-to-date on the latest trends and technologies within the Angular ecosystem.
- Participate in code reviews and provide constructive feedback to colleagues. Updated old code bases to modern development standards, improving functionality.
- Increased development speed by automating repetitive tasks using scripts and tools.
- Communicate effectively and collaborate with cross-functional teams including API developers, testing teams, and business analysts.

## Skills

---

**Languages:** JavaScript, Typescript

**Frontend & Libraries:** HTML, CSS, Angular 8+, React.js, Bootstrap, Next.js, Routes, Tailwind, Redux, Context, Angular Material, MUI

**Backend:** Nest.js, Express.js, Node

**Databases:** MongoDB, MySQL

**Tools & Others:** GitHub, REST API, Prisma, NPM, Postman, VS Code, Debugging and performance optimization

## Projects

---

### Betternight

Frontend Developer

**Technologies Used:** Angular, TypeScript, HTML, CSS, RESTful APIs, Git

- Worked on the Betternight project, a healthcare-focused web application designed to improve patient outcomes by providing sleep solutions and comprehensive care services. Leveraged Angular to develop and enhance user interfaces, ensuring a seamless and responsive user experience across devices. Collaborated closely with cross-functional teams to optimize components, implement error handling, and deliver high-quality, scalable code. Focused on improving accessibility, usability, and performance to meet healthcare industry standards.

### Sharecare

Frontend Developer

**Technologies Used:** Angular, TypeScript, HTML, CSS, RESTful APIs, Git

- Contributed to the Sharecare project, a health and wellness platform that offers personalized resources for users to manage their well-being. Utilized Angular to build and refine responsive web components, improving user engagement and accessibility. Collaborated with designers and backend teams to ensure seamless integration of features and a cohesive user experience. Focused on delivering a scalable, high-performance application that meets the diverse needs of healthcare consumers and providers.

### PharmaDem

Frontend Developer

**Technologies Used:** Angular, TypeScript, HTML, CSS, RESTful APIs, Git

- Currently working on the PharmaDem project, an advanced platform designed for healthcare professionals to streamline pharmaceutical services. Focusing on the development of the admin panel using Angular, responsible for creating and enhancing user-friendly interfaces that support efficient management of data and processes. Collaborating with backend and design teams to implement robust features, manage error handling, and improve overall performance. Ensuring the application aligns with industry standards for security, accessibility, and usability.

### Beej Nigam (Govt. Accounting Project)

Full Stack Developer

**Technologies Used:** React, TypeScript, HTML, CSS, Node.js, Express.js, MySQL, Git

- Developed a comprehensive government accounting platform designed to streamline financial and administrative processes. Responsibilities included implementing features for managing charts of accounts, bank details, and employee records. The system securely stores and verifies various proof documents, ensuring compliance with government standards. Enabled users to access and manage their profiles through an intuitive interface. Leveraged a robust tech stack, including React and TypeScript for the frontend and Node.js, Express.js, and MySQL for backend operations, to deliver a secure, high-performance application.

### CMS Tool (Client Management System)

Frontend Developer

**Technologies Used:** Angular, TypeScript, HTML, CSS, RESTful APIs, Git

- Worked on the development of a Client Management System (CMS) designed to streamline project management workflows. The system allows administrators to add users, manage project details, and track bidding information throughout the lifecycle of a project. Focused on building dynamic user interfaces that facilitate seamless project management, from initial bidding through to project completion. Collaborated with backend developers to ensure smooth data flow, including project and user management, bidding details, and progress tracking. Implemented a user-friendly, responsive layout to enhance user engagement and improve administrative efficiency. Ensured the system met security and usability standards to support diverse business needs.

## Education

---

**Sitamarhi Inter+2 College - BSEB, Patna**

Higher Secondary in Science(PCM)

May 2017 – May 2018

Sitamarhi, Bihar

**Rajiv Gandhi Proudhyogiki Vishwavidyalaya**

Bachelor of Technology in Computer Science And Engineering

Aug 2018 – Jul 2022

Bhoapl, Madhya Pradesh

## Achievements

---

- **Excellence in Front-End Development**  
Successfully developed and delivered a complex web application using Angular, resulting in a 30% increase in user engagement.
- **Training and Documentation**  
Developed comprehensive documentation for the Angular codebase and best practices, facilitating easier onboarding for new developers.
